Respirator Fit Testers

PortaCount® Pro and Pro+ Respirator Fit Testers

Which model best fits your testing needs?

PortaCount Pro 8030

For disposable filtering facepieces Series 100, 99, P3, and HEPA masks, half and full-face masks, gas masks, PAPR, and SCBA mask fit testing.

D	W	M
$150.00 Daily	$450.00 Weekly	Call Us!

PortaCount Pro+ 8038

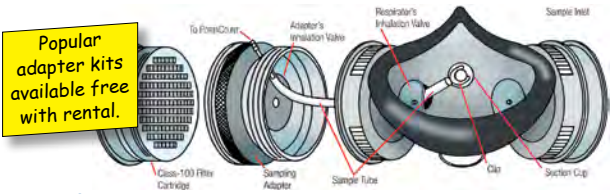
Fit test ANY tight-fitting respirator, plus N95, P2, and P1 disposables; OSHA-compliant for all respirators. Combines functions of TSI 8020 and 8095.

D	W	M
$200.00 Daily	$600.00 Weekly	Call Us!

TSI 8030 kit ships with *AC adapter, alcohol cartridge, alcohol fill capsule, storage cap, two zero check filters, alcohol supplies, 3/16" and 1/4" hose adapters, two spare alcohol wicks, carrying case, FitPro software and tutorial CDs, 1GB flash memory drive, USB cable, user manual, and calibration certificate.*

TSI 8038 kit ships with *AC adapter, alcohol cartridge, alcohol fill capsule, storage cap, two zero check filters, alcohol supplies, 3/16" and 1/4" hose adapters, two spare alcohol wicks, 25 sampling probes, probe insertion tool, neck strap, carrying case, FitPro software and tutorial CDs, 1GB flash memory drive, USB cable, user manual, and calibration certificate.*

Need a particle generator for testing in clean environments? Rent a TSI 8026 (w/o PortaCount), $50.00/day, $160.00/week.



Don't forget your respirator adapter kit!

Mask adapters are required for fit testing, but are ***not*** *included with any PortaCount rental units. If you don't have an adapter for your model respirator mask, see page 5. Kits generally include the adapter that connects your mask to the fit tester, P100 HEPA filters, and disposable components. If you need additional test supplies, buy the refill kit that matches your mask adapter kit. For-sale kits have enough supplies for 200 tests. For-rent kits have enough supplies for 25 tests.*

Free return shipping on rentals one week or longer!

Perimeter Monitoring Systems

RAECO Rents offers complete ready-to-place kits for monitoring environmental dust exposure for community air monitoring programs, local, state, and federal air quality control programs, and more.

We've simplified the process of renting perimeter environmental air quality and dust monitoring systems, by pre-configuring a kit that includes all the parts you need: a dust particulate monitor, power supply, wireless data radio, weather-safe enclosure, tripod, and a weather station.

Order as few or as many as you need to accurately cover the perimeter of your working environment. Depending on your application, you may want to order a kit with an attached weather station for monitoring temperature and humidity change, wind speed, and wind shifts.

When you order a perimeter monitoring system from RAECO Rents, you'll get web-browser access to our secure data center, where you'll be able to see real-time results from your monitoring kit and generate reports.

With a short training and setup call, you'll be able to install the equipment in the field, and start accessing real-time data over a secure web portal from your web browser (either on a PC or your mobile device).

(1) Monitor particulate around your perimeter. (2) Real-time results transfer wirelessly to a secure data center. (3) View, analyze, and prepare reports directly from your desktop, laptop, or mobile device using a standard web browser.

Rent a Perimeter Monitoring System

Perimeter Dust Monitoring Kit – Basic

D	W	M

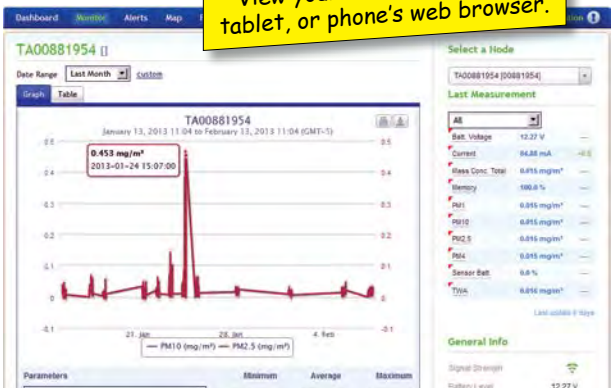
Key Specifications

- TSI DustTrak II 8530 measures aerosol particulate concentrations to PM10, PM2.5, PM1.0 or respirable size fraction
- TSI 8535 DustTrak environmental enclosure houses the measurement devices, power supplies, and data management hardware

- Netronix Thiamis ICU-820 combines control, datalogging, GPS, and GSM cellular modem communications. Sends data from each monitoring kit to a secure data center
- Includes secure access to Environet, for viewing data and creating reports using your PC or mobile device and a web browser.

- Optional weather station measures wind speed and direction, air temperature and pressure, and humidity

View your data from any PC, tablet, or phone's web browser.



Need your system to measure VOCs? Monitor sound levels?

Call us for help building the exact perimeter monitoring kit to fit your application needs.

Dust monitors reduce employee exposure risks

Area exposure monitors measure airborne particulate concentration over time in an area. Personal exposure monitors perform the same function, but work on concentrations in the employee's breathing zone. Used together, they provide effective real-time data for making decisions regarding employee health and ventilation control.

Recently, a customer with a large welding operation noticed visible smoke on the plant floor during operation, and needed to address both potential hexavalent chrome and total respirable dust exposure. They used the TSI DustTrak II for area monitoring, and employees wore AM510s for personal monitoring.

The TSI devices were used in tandem to characterize the environmental and breathing area particulate concentrations, and to evaluate several strategies to control ventilation and reduce exposure. With data from the DustTrak II and AM510s, the customer was able to select the most effective and energy efficient solution for reducing employee exposures.

Later, IH sampling confirmed dramatic reductions in both chrome and respirable dust exposure. Plus, employees reported being more comfortable in their environment.

SidePak™ AM510 Personal Aerosol Monitor

Intrinsically safe units!

TSI

SENSIDYNE Air Sampling Pumps

GilAir Plus 5-Liter Universal Air Sampling Pump

GilAir Plus (Single)

W	M
$100.00 Weekly	Call Us!

GilAir Plus (5-Pack)

D	W	M
$210.00 Daily	$700.00 Weekly	Call Us!

- Weighs just 20.5 ounces
- Pressure and temperature calibrated, with datalogging feature
- Constant flow 25-5000 cc/min, constant pressure 1-5000 cc/min
- High-flow and low-flow constant pressure, constant flow — no adapters required
- Up to 40" H2O back pressure in high flow, up to 25" H2O in low flow
- Automatically performs restart to recover from temporary faults
- Dock provides charging plus communication to PC or calibrator
- Battery proven to last 12 hours on a single charge

Single kit includes *one sampling pump, single station communication/charging dock, USB cable, AC power supply, filter cassette holder, charcoal tube holder, pump management software, hex wrench, user manual, certificate of performance, and carrying case.*

5-Pack kit includes *five each: sampling pump, filter cassette holder, charcoal tube holder, certificate of performance plus one each: five-station communication/charging dock, AC power supply, hex wrench, pump management software, user manual, and carrying case.*

Gilian 5000 5-Liter Live Flow Air Sampling Pump

Need high back pressure? Gilian 5000 is the pump for you!

Comes with *1000-5000 cc/min pump, low flow constant pressure adapter, NiMH battery, charger, filter cassette holder, US 120/240V power cord, 36" tubing, user manual, and carrying case.*

PhoCheck Tiger Photoionization Detector (PID) for VOCs

- Dynamic range ppb to 20,000 ppm for specific volatiles
- Accuracy to ±5% display reading ±1 digit
- LED, vibratory, and audible alarms — pre-programmed time-weighted average (TWA) and short-term exposure limits (STEL) for up to 450 different gases
- Logs >120,000 data points including date and time stamp, 33 hours at one log per minute
- Intrinsically safe ATEX, IECEx, and cUL approvals
- Battery life up to 30 hours, and can be changed in hazardous areas
- Capable of detecting Benzene without the need for specific tubes in areas of Benzene gas only; Requires selective pre-filter tubes for detecting Benzene in other compounds

Instruments ready when you need them!

Do you have the time, expertise, or staff availability it takes to properly maintain your portable industrial hygiene and safety monitoring instruments? Are you sure they'll work when you need them to, or have all the accessories you need to perform your next test?

Before shipping instrumentation to you, a RAECO Rents technician calibrates the unit and runs diagnostics to make sure your rental kit is in proper working order.

Visit www.RaecoRents.com

We Treat You Right...

RAECO Rents is here to help you fulfill your most important objectives.First, to get the instrumentation you need, when you need it. Second, to get instrumentation that works. Third, to make sure you can use the instruments to their fullest capability. We want you to have a great experience working with *RAECO Rents!*

Free Round-Trip Shipping for the Rest of 2013!

Free round-trip UPS Ground shipping on every rental one week or longer in duration. If you need the rental faster than Ground shipping allows, you only pay the difference for the upgraded delivery to your location (the Ground return is still free). Good on qualifying rentals booked and shipped thru Dec. 31, 2013, and shipped from the RAECO Rents service locations.

RAECO Rents Instant-On Guarantee

If our equipment doesn't arrive in working order, your rental is FREE for as many days as it takes us to get you a working unit. So, if we ship you a unit that doesn't work out of the box, and the replacement takes two days to arrive, you won't pay for those two days — and we'll add two free rental days to make up for any lost time.

Get your rental late? Let us know. If your rental equipment has been held up by bad weather, issues with the carrier, or other factors beyond our control, call us. We'll adjust the rental period to satisfy your requirements (and you won't be charged for the additional time.)

Easy Return Procedures

We include a return shipping label and packing tape in every rental kit for easy rental return. If we need the rental back sooner, we may ask you to use a priority label that we generate at our cost. You just stick the label on the box and drop it off at any one of UPS's 40,000 drop points. Visit *UPS.com* to find the UPS location closest to you.

After-Hours Support

If you rent from us and need support during non-business hours (8am–5pm CST), call 866-736-8347 x2000, and leave us a message. Our on-call rental technician will call you back as soon as possible.

Buy Gently Used Instruments on eBay!

Using an instrument more often than it'd make sense to rent? Short on the budget needed to buy a brand new unit? Are you in the market for gently used instrumentation? Check out RAECO Rents' new eBay store! We sell gently used units out of our rental pool to help customers balance their demand and budgetary needs.

Visit *stores.ebay.com/raecorents*

We Want to Connect with You

Get the latest updates from RAECO Rents on your choice of social networks. Watch how-to videos, learn about new instruments, and get step-by-step instructions on how to use them.
